

DEVICE MATRIX

Shaun the Sheep/Fun with the Flock/ 01.03.2024

Devices

iOS

Shaun the Sheep: Fun with the Flock has been optimised for Apple officially supported devices running iOS 16 and later (see [iPhone models compatible with iOS 16 – Apple Support \(UK\)](#)). However the app should still work on devices from iPhone 8 and iPad 2017 onwards as long as they are running iOS 15 or above.

Android

The App is designed to work best on devices running Android 10 and above and that support augmented reality via ARCore. To check whether your device supports ARCore please refer to this list: <https://developers.google.com/ar/devices>

This app **may** not run on devices which do not meet these requirements.
